Smartphone INNOVATION ATEX II 2 D

The INNOVATION 2.0 phone is an ATEX certified Smartphone for zone 1-21 and IP68 protection. It is water and shock resistant, and it is designed for professional use. Its lightweight and ergonomic design gives users immediate access to business applications, email accounts and other information. This ATEX smartphone is designed to be used by customers in the industry who need access to their existing IT infrastructure for process control, documentation, or calibration of field devices. With the INNOVATION 2.0 series phone it is possible to connect all the users of the company (no matter where they are working) to the IT infrastructure.

The ATEX INNOVATION 2.0 phone with AGPS and motion sensor is suitable for protecting workers.

Box contents: phone, battery, USB cable, protector, European charger, headphones, stylus, screen protector, screwdriver and instruction manual.
